

Accelerate Summer School Learning

Unlock Literacy Success

This summer, give your students the structured, effective, and engaging instruction they need with Really Great Reading's Science of Reading-aligned summer school curriculum. Our evidence-based approach helps students build strong foundational reading skills, decode words confidently, and accelerate their reading growth in just a few weeks.

What Teachers Will Experience

Digital Teacher's Guide

Includes daily scripted lesson plans and a research-filled appendix.

Online Teacher Presentation Tool

Includes animations, posters, and a treasure trove of supplemental resources. Helping the teacher deliver concise and vibrant lessons, and featuring new Guest Teacher Videos, this tool is your co-teacher in the classroom!

Professional Learning Courses

This comprehensive package wouldn't be complete without Really Great Reading's exceptional professional eLearning courses. Each package contains three hours of upfront, professional learning to ensure you can teach lessons with fidelity and confidence.

Diagnostic Assessments

In just 5-7 minutes, Really Great Reading's diagnostic decoding assessments answer key questions, such as: Which students are struggling with decoding? What types of words are they struggling with?

Access to the Grouping Matrix

A complimentary, web-based, password-protected, secure student data management interface, the Grouping Matrix enables you to group K-12 students according to the type and depth of their decoding difficulties using data from grade-level Oral Reading Fluency passages (such as DIBELS, AIMSweb, Six Minute Solutions, Read Naturally, EasyCBM) and our complimentary diagnostic assessments.

2 hours of professional development

75 minutes of implementation training

5 weeks of **digital** instructional lessons

 **Why is our Summer School Program Free?**

We are mission-driven. We continue to see a pervasive literacy crisis. Really Great Reading can't stand by and watch as readers fall further and further behind. The crisis is real but if we work together with educators, we can all help mitigate the impact. Summer school is the perfect time to intervene and make important gains.

 **Comes in Three Instructional Levels****1. Emerging**

For Rising 1st Graders and Severely Struggling 2nd and 3rd Graders

This level of instruction helps develop automaticity with the foundational skills students need to jump-start their journey to strong orthographic mapping and fluent reading. Students will:

- Solidify their letter knowledge
- Build fluency with high-frequency words
- Develop basic phonemic skills (isolation, segmentation, and blending)

2. Developing

For Rising 2nd Graders and Struggling Upper Elementary Students

This level of instruction is designed for children who have mastered some fundamental foundational skills but need additional insights about word structure to accelerate their word storage abilities. Students will:

- Review letter-sound relationships and become fluent with high-frequency words
- Gain advanced phonemic skills (deletion, addition, and substitution)
- Read and spell complex single-syllable words, build automaticity with complex closed syllable words, and develop strategies for reading multi-syllabic words

3. Advancing

For Struggling Students in Grades 6-12

This level of instruction is designed for older students who have reached adolescent grades and don't have sufficient decoding skills to support comprehension. Students will:

- Learn and practice basic and advanced phonemic awareness skills and then leverage those skills for reading and spelling
- Examine phoneme-grapheme relationships in complex single-syllable words with three syllable types (Closed, Open, VCE)
- Read 2-, 3-, and 4-syllable words with three-syllable types and the Schwa

**STUDENT MATERIALS INCLUDE:**

Student Practice Pages

Letter Tile Freeplay

Reading Playground
